

## **Questions - Infectious diseases**

### **Stomatology - IV. year**

1. Infection and its course
2. What factors are influencing the course of infectious diseases?
3. The hosts' immunity in infectious diseases
4. Differential diagnosis of meningeal irritation
5. Aseptic meningitis and encephalitis (aseptic meningitis and tick-borne encephalitis, diagnosis, treatment)
6. Bacterial meningitis (diagnosis, clinical course, treatment, prophylaxis)
7. Invasive diseases due to *Haemophilus influenzae* type b (epiglottitis, meningitis)
8. Meningococcal invasive diseases
9. Mumps and its complications, other diseases of salivary glands
10. Lyme borreliosis
11. Rabies and its prevention
12. Tetanus
13. Differential diagnosis of exanthematic diseases of childhood
14. Infections due to virus varicella-zoster
15. Infections due to HSV-1 and HSV-2
16. Differential diagnosis of lymphadenopathy
17. Differential diagnosis of tonsillopharyngitis
18. Streptococcal infections (tonsillitis, erysipelas, scarlet fever)
19. Infectious mononucleosis
20. Gastroenterites of viral origin and enterotoxigenosis
21. Gastroenterites of bacterial origin
22. Viral hepatitis transmitted in faecal-oral route
23. Viral hepatitis transmitted in parenteral route
24. Adenovirus and Coxsackie virus infections
25. Influenza, parainfluenza
26. Viral infections of respiratory tract (RSV, adenovirus, rhinovirus). Acute obstructive laryngitis-croup
27. Infections due to *Mycoplasma* and *Chlamydia*
28. Tularemia
29. Leptospirosis
30. Toxoplasmosis
31. Malaria
32. HIV infection /AIDS
33. Clinical features of HIV/AIDS infection in oral-facial region
34. The most important opportunistic infections and tumors
35. Covid - 19
