

## **Teaching pathophysiology in 2019/2020 – dental medicine**

### **Updated conditions for the exam**

The student is obliged to register for the exam before the deadline using SIS (other ways of registration will not be accepted). Registration is necessary for the regular term as well as for potential 1<sup>st</sup> re-examination or 2<sup>nd</sup> re-examination. The condition for registration for the exam is obtaining the credit.

The exam consists of a practical exam and oral exam. Practical and oral exam represent one complex and they cannot be separated into two exam terms.

Practical exam consists of one question related to practical exercises. Failure in the practical exam means classification of the exam “fail”.

Oral exam consists of 3 questions related to the syllabus of the subject. To pass the oral exam, the student must show sufficient knowledge in each of these 3 questions.

Final classification takes into consideration not only the performance in the oral exam but also the classification of the practical exam.

Due to capacity reasons, the exam can be divided into several days within the given exam date. Students are required to attend the exam according to the schedule or examiner's instructions.

In the case of the distance form of the exam, an interview will be conducted by Zoom or similar tool. It is therefore necessary for the student to be equipped with an internet connection, a computer with a camera and a microphone. In the case of distance examination, the exam will start immediately after the questions have been asked and the student will not have time to prepare.

List of exam questions can be found here:

### **Credit**

The conditions for the credit remain unchanged. They will be applied to the part of the semester realized standardly.

### **Teaching**

Invitations to online lessons are sent by e-mail via SIS.

Teaching materials are available on the website of the Department of Pathophysiology:

[http://patofyziologie.lfp.cuni.cz/?page\\_id=677&lang=en](http://patofyziologie.lfp.cuni.cz/?page_id=677&lang=en)

Other study material is the recommended literature listed in the SIS and at this link:

[http://patofyziologie.lfp.cuni.cz/?page\\_id=687&lang=en](http://patofyziologie.lfp.cuni.cz/?page_id=687&lang=en)
