Geochemistry 1st Edition

by William M. White (Author)

4.5 ★★★★★ 48 ratings

There is a newer edition of this item:

Geochemistry 2E

\$103.27

★★★★★ (16)

Only 6 left in stock (more on the way).

This book provides a comprehensive introduction to the 'geochemical toolbox': the basic principles and beginning with a review of thermodynamics and kinetic environs. These basic concepts are then applied to systems and the behavior of trace elements in magma intruding rhyolitic and stable igneous geochemistry.

Geochemistry 2E 2nd Edition

by William M. White (Author)

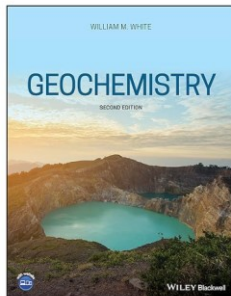

4.4 ★★★★★ 16 ratings

A Comprehensive Introduction to the "Geochemist Tool Modern Geochemistry

In the new edition of William M. White's *Geochemistry*, you will find each of the core principles of geochemistry cover methods to examining Earth's core composition and explicit fuels, this definitive edition encompasses all the information the earth sciences for beginners and beyond.

For researchers and applied scientists, this book will act as theories of geochemistry, applications, and environmental new chapters on the geochemistry of the Earth's surface (geochemistry, and applied geochemistry as it relates to environmental geochemical exploration.

Chapter 9: Stable Isotope Geochemistry	363
Introduction	363
Scope of Stable Isotope Geochemistry	363
Notation	364
Theoretical Considerations	365
Equilibrium Isotope Fractionations	365
Kinetic Isotope Fractionations	371
Isotope Geothermometry	373
Isotope Fractionation in the Hydrologic System	376
Isotope Fractionation in Biological Systems	378
Carbon Isotope Fractionation During Photosynthesis	379
Nitrogen Isotope Fractionation in Biological Processes	381
Oxygen and Hydrogen Isotope Fractionation by Plants	381
Biological Fractionation of Sulfur Isotopes	382
Isotopes and Diet: You Are What You Eat	383
Paleoclimatology	386
The Marine Quaternary $\delta^{18}\text{O}$ Record and Milankovitch Cycles	387
The Record in Glacial Ice	390
Soils and Paleosols	392
Hydrothermal Systems and Ore Deposits	393
Water-Rock Ratios	394
Sulfur Isotopes and Ore Deposits	395
Stable Isotopes in the Mantle and Magmatic Systems	398
Stable Isotopic Composition of the Mantle	398
Stable Isotopes in Crystallizing Magmas	403
Combined Fractional Crystallization and Assimilation	405
Isotopes of Boron and Lithium	406
References and Suggestions for Further Reading	410
Problems	413

Zachary Sharp Principles of Stable Isotope Geochemistry (2nd Edition)
